

Decide Once: Build Your Identity Kit

Name: Bhoompally Kalyan Reddy | Track: Machine Learning / AI Fluency

Identity Kit

1. Fonts:

- Heading Font: Inter (Bold)
- Body Font: Inter (Regular)
- Why: Using a single font in two weights keeps the site looking clean, technical, and professional without distracting the reader.

2. Color Palette (Hex Codes):

- Main Background: #FAFAFA (Warm White)
- Main Text: #171717 (Near Black)
- Accent / Link Color: #0070F3 (Electric Blue)
- Why: High contrast for readability. The single Electric Blue accent ensures that calls-to-action stand out, while the rest of the site remains quiet.

3. Logo & Favicon:

- A clean, simple monogram using my initials in the Inter Bold font, enclosed in brackets: [BK]
- Hex color: #171717 (Near Black)

4. Two-Line Style Note (For Claude Project):

"Keep the design quiet and technical. The work should be the loudest thing on the page. Use generous whitespace, Inter font exclusively, and only use Electric Blue (#0070F3) for actionable links or key metrics."
